## PLENTY OF MONEY TO LOAN

The Banks Are Plentifully Supplied. but the Demand Continues Light.

Grains Were Decidedly Firm and Steady, Corn Showing Indications of Uneasiness, with Narrow Fluctuations in Prices.

## MONEY AND STOCKS.

The Associated Bank Clearings-Plenty of Money to Loan.

The banks are full of money, while the demand for loans continues comparatively light. The current rate of interest is 7 to 8 per cent., though there are doubtless occasions when preferences are given which result in a very material reduction in these figures. The clearings of the six associated banks yesterday amounted to \$633,381.88; balances, \$70,114.52. On the corresponding date of 1891 the clearings were \$480,089.04; balances, \$69,539.18.

NEW YORK QUOTATIONS. At New York yesterday money on call

was easy at 14 to 2 per cent., the last loan being made at 14, closing offered at 14. Prime mercantile paper, 34 654 per cent.

Sterling exchange was quiet but steady at \$4.85% for exty-day bilis and \$4.88 for demand. The total sales of stocks were 416,657

shares, including the following: Atchison, 16,920; Chicago Gas, 24,150; Delaware, Lackawanna & Western, 11,920; Erie, 22,780; Louisville & Nashville, 6,225; Northern Pacific preferred, 18,560; New England, 35,585; Reading, 108,830; Richmond & West Point, 10,140; St. Paul, 27,900; Union Pacific, 14,100;

Western Union, 10,800. The stock market was comparatively quiet, and moved within narrow limits when compared with the wide fluctuations of the last two weeks. The substantial part of the movement was the realizations in Reading and the pressure of short stocks in the remainder of the list. The market was rather irregular throughout the greater part of the day, and despite the weak-ness of the general list in the atternoon specialties like Tennessee coal, the Lake Erie & Western stocks and the Chesapeake & Ohio made substantial progress. After Reading, Atchison was the weakest stock for awhile, but it was persistently raided, and its final loss is insignificant. St. Paul was pressed for sale also, and it made no response to the good showing of the earnings. In the forenoon New England was the special strong point, and it scored a rise of 11/2 per cent., but failed to hold it in the late trading. On the other hand Chicago Gas was made the special point of attack by the bears in the early dealings, and it was orced off nearly 14 per cent. from its Tuesday night's figures. The general list opened with continued pressure, and first prices were all lower, Reading being down per cent., but the strength of New England rallied the entire market, despite the pressure on Chicago Gas, and advances of arge fractions were made all along the line without any special feature ontside of the low-priced shares and New England. The forenoon was marked by a firm temand the best prices of the generally reached toward 12 o'clock. After that time, however, market drifted into dullness, and prices began to move off under the stimulus of the weakness in Reading, and the pace was accelerated in the last hour by a vigorous drive by the bears. The pressure was removed toward the end of the session, however, and a slight rally was permitted. The market closed with a firm tone on a light business. The final changes are generally small losses, but Reading is

Hudson and Northern Pacific preferred each Railroad bonds were quieter than for a long time, the total transactions being only \$2,928,000, while the activity in the several Reading issues was eclipsed by that in Texas & Pacific seconds and Richmond & West Point Trust fives. The temper was somewhat mixed, and the final changes are quite irregular. The Readings are gener-

The Usual Inspections - Inconsequential Movements in the Speculative Market. On 'Change yesterday wheat was firm, corn steady and oats quiet. There were inspected in two cars of wheat, ten of corn and four of hay. The speculative market opened firm on wheat on reported better prices abroad, these reports coming from private sources. It was steady for a time. but later public cables, together with re-ported increase and better condition of wheat acreage in Ohio and Illinois, caused considerable selling by holders. As offerings increased the market weakened, and was heavy until the last hour, when strength was imparted by large export clearances, both of wheat and flour and a fnrther report of sales for shipment. The market closed strong at about the highest prices of the day. Corn was uneasy and trade light, the changes in prices being narrow. 'Change prices ruled as follows: Wheat-No. 2 red, 92c; No. 3 red, 85c; rejected, 75@88e; unmerchantable, 65@75e;

Testing New Varieties, Farm and Fireside. Nearly every progressive gardener and farmer tests promising new varieties of grains and plants for himself. He may be shy of the high-priced novelties introduced by enterpris-ing seedsmen; but new varieties that take their place in the standard list he wants for his main crops. However well they may do in other places, the only way for him to be sure that they will be adapted to his climate and soil is to test them for him-

The testing of new varieties adds much nterest and pleasure to the gardener's or farmer's work. From the time the seed is planted until the crop is grown does he watch the progress and hope for the promised results. And there is scarcely a doubt that the crop will receive more attention and better cultivation than are given ordinarily. The interest in the growth of the new varieties contributes not a little toward better farming and gardening. In the long run it pays to be judiciously experimenting with seeds and plants that really promise to be an im-

provement. Bush Lima Beans.

National Stockman and Farmer. As the catalogues will soon begin to come to hand and all are thinking what it is best to plant I wish to say don't forget bush lima beans. It requires so little seed to raise enough for an ordinary family that the expense is small. Plant about tweleve inches apart, putting one seed in a hill. Twentyfive or thirty bills are sufficient. They are much finer in flavor than the pole lims beans. Don't forget to add the bush lims to your list of seeds.

A Transparent Sham.

New York Press The claim of the Cleveland insurgents that their revolt against Hill is a movement in behalf of public morals is one of the most ridiculous and transparent shams ever witnessed in American politics.

WHEAT CLOSED A CENT UP

Notwithstanding the Fact Bulls Are Credited with Manufacturing News.

Better Demand at Home with Indicated Shortage Abroad Mostly Responsible for the Advance in Chicago Grain.

TRADING AT CHICAGO. Fluctuations in Maize Maintained in Nar-

row Limits. CHICAGO, Feb. 17 .- Considerable nervousness was still apparent in the wheat market to-day, but the general tone was one of strength on the bullish character of the news received, and the close was firm at an advance of 1c, compared with the final figures of yesterday. May opened %o higher, at 91%c, advanced to 924c, broke to 91%c, reacted to 93%c, went off to 91%c, remained steady for a time, then touched 91%c, but grew strong again, rallying to 92%c and closing firm at 924c. The higher opening and advance early in the session was due to the stronger and higher English cables which were rather a surprise after the action of the American markets yesterday. The clearances were also rather large and a good inquiry was again reported. But operators got fairly well loaded up with wheat, and then a more general selling pressure started in which caused the subsequent decline, helped along by weaker continental cables. Local operators evidently sold themselves short on the break. They became uneasy in the last half hour, and started in to cover, the market responding with a strong upward movement. The advance was attributed partially to rumors that France was agitating the question of taking off the duty on wheat. The early news was mostly bull-

ish, but it was some time before speculators cared to risk handling long lines, as there was a feeling of distrust in regard to some of the bull news which had been received within the past day or two, it being feared that it was manufactured to order to make a strong market for longs to sell on. The strong cables, however, in the face of our weak market of yesterday, tended to verify the statement of heavy exports. It was said that 325 boat-loads, carrying 2,584,000 bushels, had been taken for export on the Atlantic sea-board alone during the past two days.
Clearances from New York were also
larger, being 257,000 bushels of wheat and
20,000 barrels of flour. Antwerp was quoted nearly 2 centimes per bushel higher. Minneapolis reported 60,000 bushels sold for export, and a cargo was sold. Milwaukee reported an inquiry for two lots of 100,000 bushels each. A rumor was started that Russia was about to remove the restrictions prohibiting the exportation of wheat, but this did not receive confirmation and could not be traced to any relia-ble source. Berlin and Paris were quoted lower. There was some demand for flour here from France for April and May ship-ment, and several lots reported sold. Do-mestic markets were higher. Arrivals in the Northwest were rather small.

Corn was quiet and steady, with fluctua-tions confined to a range of 4c during the entire session, and the close was unchanged. The receipts were somewhat larger than were looked for, but there was a falling off in the grading. Liverpool quoted prices 4c higher. Trade was slack and prices were not materially affected by the fluctuations in wheat. Oats were inactive and steady, and closed

Hog products were quiet and weak during most of the session, but firmed up toward the close and closed without change compared with yesterday. Estimated receipts for to-morrow are: Wheat, 145 cars; corn, 285 cars; oats, 190 cars; hoge, 32,000 head. The leading futures
